

The following Listing of Claims will replace all prior versions, and listings, of claims in the application.

LISTING OF CLAIMS:

1. (Previously Presented) A flywheel assembly to which torque is transmitted from a crankshaft of an engine, comprising:
- a flywheel;
- a damper mechanism being configured to connect elastically said flywheel to the crankshaft in a rotation direction; and
- a support member being attached to the crankshaft to support said flywheel on the crankshaft, said support member having an axially extending portion freely attachable to and detachable from said flywheel in the axial direction.
2. (Previously Presented) The flywheel assembly according to claim 1, wherein said support member supports said flywheel in the axial direction.
3. (Original) The flywheel assembly according to claim 1, wherein said support member supports said flywheel in radial direction.
4. (Previously Presented) The flywheel assembly according to claim 1, wherein said support member is flexible in a bending direction and supports said flywheel such that said flywheel is movable in the bending direction.
